Art Unit: 3742

## Claim Rejections - 35 USC § 112

Claims 10-13 and 15-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13, lines 2-3 recites a "heater... without a fan, such that heated air... flows... solely through convection." Applicant evidently contemplates "natural convection," by as distinguished from "forced convection," which utilizes mechanical air movement. Both transfer heat energy by means of "convection," however, and the claim should therefore recite specifically "natural convection."

Claim 15 recites "stacking the loaves," when Applicant evidently intends that the step be "standing the loaves," since the loaves could not easily be "stacked" one on another.

## Claim Rejections - 35 USC § 102

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. 1745518.

The Examiner notes that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Referring to Figs. 1-3 especially, page 1, lines 54-63, and page 2, lines 10-17, US'518 discloses a merchandiser comprising a rack which is open when lid 8 is open, rear, front, and side walls, a bottom 12 with openings 26 permitting air flow therethrough, a base 5 resting on the floor and both supporting the rack and forming a closed interior therewith (beneath bottom 12), a heater 22 heating air that flows up through the openings 26. Heater 22 would appear prima facie to supply air at temperatures between 90-100 degrees F. US'518 is clearly capable of holding vertically standing loaves of bread.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by US Pat. 7012218.

Referring to Figs. 1 and 2, and col. 2, line 55, through col. 3, line 35, US'218 discloses a merchandiser comprising an open rack, rear 16, and side walls, a front wall height 12 substantially less than the rear wall height, a bottom having generally horizontally extending portions 26, 27, 28 with an opening permitting air flow therethrough, a base 14, 48 resting on the floor and both supporting the rack and forming a closed interior therewith (beneath bottom stepped bottom), a heater 22 heating air that flows up through the openings 26. Heater 22 would appear to be capable of supplying air at temperatures between 90-100 degrees. The bottom wall is constructed from a plurality of "slats" (26a, 26b, 26c). US'218 is clearly capable of holding vertically standing loaves of bread.

Art Unit: 3742

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. 4827107.

Referring to Figs. 3, 5, 10, & 12, and col. 4, lines 11-40, US'107 discloses a "rack" with vertical rear, front, and side walls, resistance heater 41, a bottom with an opening 45 permitting air flow therethrough, such that bread loaves can be placed therein to stand side-by-side, a base 32 supporting the rack and containing heater 41. Since US'107 is intended to retain warm eating temperatures, the interior appears inherently capable of being heated to 90-100 degrees F.

## Allowable Subject Matter

Claims 5-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 10-14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 15-29 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph M. Pelham whose telephone number is 571-272-4786. The examiner can normally be reached on M-F 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans can be reached on 571-272-4777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
